The Northern Periphery and Arctic Programme 2014-2020 forms a cooperation between 9 programme partner countries; the Member States of Finland, Ireland, Sweden and the United Kingdom (Scotland and Northern Ireland) in cooperation with the Faroe Islands, Iceland, Greenland and Norway. This means that the programme area encompasses the Euro-Arctic zone, parts of the Atlantic zone and parts of the Barents region, neighbouring on Canada in the West and Russia in the East. Despite geographical differences, the large programme area shares a number of common features, such as low population density, low accessibility, low economic diversity, abundant natural resources, and high impact of climate change. This unique combination of features results in joint challenges and joint opportunities that can best be overcome and realised by transnational cooperation.

The Northern Periphery and Arctic Programme 2014-2020 aims to expand the regions’ horizons, building on concrete outcomes and enabling the programme area to be a 1st class region to live, study, work, visit and invest. It is the programme’s vision is to help to generate vibrant, competitive and sustainable communities, by harnessing innovation, expanding the capacity for entrepreneurship and seizing the unique growth initiatives and opportunities of the Northern and Arctic regions in a resource efficient way.

The Northern Periphery and Arctic Programme 2014-2020 is part of the European Territorial Cooperation Objective in the framework of the cohesion policy, supported by the European Regional Development Fund. The programme operates in a multi-layered policy landscape, making it well positioned to contribute to and align with the Europe 2020 Strategy, national and regional policies and development strategies, macro regional and sea basin strategies, and other programmes covering parts of the geographical area. In addition, increased interest and rapid developments in Arctic regions have resulted in a more explicit recognition of the programme’s Arctic dimension in regional development.

**Priorities**

The development needs and potentials of the programme area, together with the policy and historic context have resulted in 4 priority axes to achieve the programme vision:

1. Using Innovation to Maintain And Develop Robust And Competitive Communities
2. Promoting Entrepreneurship to Realise the Potential of the Programme Area’s Competitive Advantage
3. Fostering Energy-Secure Communities through Promotion of Renewable Energy and Energy Efficiency
4. Protecting, Promoting and Developing Cultural and Natural Heritage

The sparsely populated communities of the programme area are the focus point of all 4 priority axes.

More information on the priority axes can be found in the Cooperation Programme document, on the website, www.interreg-npa.eu.
How much funding is available?
The NPA 2014-2020 will allocate in total approximately 56 MEUR through bi-annual calls. The funding will be allocated to projects with a total budget between 250,000 EUR and 2 MEUR. A precondition for funding is that the projects provide at least 35-50% of the total project costs as match funding through own or national or regional sources. The share of the match funding depends on the country where the partner is located. However, SMEs always have to provide a minimum of 50% of their costs in match funding.

Who can apply?
In general, the programme is open for public and private partners of all kinds from inside the programme area, for example regional and local authorities and other public sector organisations, research institutions and private entities delivering public service, private-public partnerships, social enterprises, and third sector organisations. Besides that, local and regional SMEs, among these specifically micro enterprises in remote and sparsely populated areas and business organisations, etc.

What kinds of projects are supported?
Projects shall first of all address the main challenges and potentials described in the Cooperation Programme. Furthermore, projects shall fulfil a number of qualitative objectives, such as:

- **Concrete**: The project outputs are recognisable as a tangible solution (most commonly a product or service) which address identified challenges within the Programme area.

- **Innovative**: The project output is new or innovative to the partner organisations, the partner countries involved, or the Programme area.

- **Focused**: Projects can demonstrate a link between the development challenges or opportunities they address and the relevant Programme specific objective, and they can state the changes they intend to bring about.

- **Transnational**: The design of project outputs clearly draws on the results of transnational cooperation, e.g. transferring models/knowledge/technology from one region to another, partners complementing each others’ competences and resources, combining different regional skill sets, gaining a critical mass, etc.

How and when to apply?
The Fourth Call for main projects is expected to open from 1st May-30th September 2016. The call will be open for all 4 Priority Axes. Decisions will be made in December 2016. In addition, a continuous call is open for preparatory projects. This is a tool developed to bring together potential project partners and to generate high-quality main project applications. Guidance for applicants can be found in the NPA Programme Manual.
